IDS 210

kiosk innova

Fundamentals

IDS 210 has been designed to showcase the product in a store with the most up-to-date information and to present it to the customers in an eye-catching way. It allows the customers to have up-to-date information of products and to compare the features of selected products at the same time.

IDS 210 also allows instant uploading of different visuals and features of the products on to the system using the online updating feature. In addition, with the central management software Ki Manager it allows remote changing of technical descriptions, visuals and prices of products which are introduced on the kiosk. Visually supported promotions with comparison opportunity increase customer satisfaction and success of sale.

Cabinet

Metal body, flexible coloring and branding
