

CSH 210

Fundamentals

Developed for companies that offer collection services like prepayment and invoice payments, this solution allows customers to make all their payments by means of banknotes, coins or credit/bank cards. Thanks to its user-friendly interface the CSH 210 can perform any function normally carried out at cashier desks.

Having a 500, 1000 or 2000-banknote money input unit optionally, CSH 210 is also featured with Ki control board input, telephone set and internal camera, and 17" LCD screen. It also includes a 1000 VA UPS. Power supply is continuously checked for uninterrupted service. Prioritizing safety, CSH 210 can detect external malicious attempts thanks to its security camera, impact sensor and motion detecting security services. Electronic lock with 2mm, 6mm and 12mm case options ensures safety of the cash in the cabinet. As the cash in the cabinet and the kiosk components are in different areas, Kiosk technician can never access the money. A different Kiosk configuration can be easily provided for each project thanks to its modular structure. Ensuring foreigners to comfortably benefit from self-service applications with its alternate language and currency option; CSH 210 allows the companies to take advantage of the system even in touristic regions.

Cabinet

Metal body, company cladding
